Professional Summary

Android Engineer with 3+ years of experience designing, developing, releasing, and maintaining native mobile applications using **Kotlin, Java, Android SDK, Jetpack Compose, XML, Clean Architecture, and MVVM**. Production experience spans location and maps, productivity, audio and media, **AI-assisted utilities, Firebase, REST APIs, Google Play Billing, RevenueCat, AdMob monetization, crash and ANR resolution, and Google Play delivery**.

Technical Skills

- **Languages and Android:** Kotlin, Java, Android SDK, Jetpack Compose, XML layouts, Material Design, Navigation, lifecycle-aware state, background work, notifications
- **Architecture and Data:** Clean Architecture, MVVM, modular architecture, Room, SQLite, dependency injection, Koin, Hilt, Ktor, Retrofit, REST APIs
- **Firebase and Backend:** Firebase Authentication, Realtime Database, Crashlytics, Analytics, Remote Config, MongoDB, Node.js, Socket.io, JavaScript, TypeScript
- **Platform Integrations:** Google Maps API, location and navigation, Google Calendar, Google Drive, audio and media, sensors, printing
- **Billing and Monetization:** Google Play Billing, RevenueCat, subscriptions, one-time purchases, purchase acknowledgement, restoration, subscription-state handling, error and retry flows, AdMob, ad placements, premium screens
- **Reliability and Delivery:** Crash and ANR triage, production debugging, regression testing, Git, Google Play release workflows
- **AI-assisted Engineering:** Claude, Codex, ChatGPT, and Antigravity for technical planning, implementation support, debugging, and image-asset generation
- **Professional Strengths:** Problem solving, ownership, attention to detail, technical communication, adaptability, and team collaboration

Work Experience

Android App Developer - Top Edge Technologies (Pvt) Ltd

May 2025 - Present | Pakistan

- Engineer and maintain native Android applications using Kotlin, Jetpack Compose, Clean Architecture, MVVM, Room, Ktor, Koin, Firebase, and Google APIs.
- Deliver production features across location, productivity, media, utility, and AI-assisted product categories, from implementation through Google Play release support.
- Diagnose and resolve crashes, Application Not Responding (ANR) issues, lifecycle defects, and regressions in inherited Android codebases using Crashlytics and production evidence.
- Implement and refine AdMob plans and placements, subscriptions, one-time purchases, and premium screens to improve ad show rates, revenue delivery, and purchase opportunities without exposing confidential performance data.
- Designed and built a reusable billing module supporting Google Play Billing and RevenueCat, including purchase acknowledgement, restoration, subscription-state handling, error and retry flows, analytics, and remote configuration; used across multiple company applications.

Android App Developer - Appsqueeze Technologies (Pvt) Ltd

July 2023 - April 2025 | Pakistan

- Developed native Android applications with Kotlin, Java, Android SDK, XML layouts, and Material Design components.
 - Applied MVVM, Room, Retrofit, Firebase Authentication, and Firebase Realtime Database to connected, data-driven product features.
 - Built responsive user interfaces, debugged production issues, and supported reliable releases across Android versions and device configurations.
 - Collaborated through Git-based development workflows and maintained clear ownership of assigned application features.
-

Key Highlights

- Engineered multiple production Android applications from the ground up.
- Worked on public products ranging from early-stage releases to established applications with 1M+ installs.
- Delivered reusable billing architecture, integrations, production maintenance, and Google Play release support.
- Built across maps, scheduling, media, utilities, AI-backed identification, Firebase, billing, and monetization.

Selected Projects

Voice Notepad - Speech to Text

- Maintained an established speech-to-text notes product through screen redesign, issue fixes, and monetization updates. Public Google Play listing: 1M+ installs.
- **Tech:** Kotlin, Android SDK, speech-to-text APIs, monetization integrations
- **Google Play Store Link:** [Voice Notepad - Speech to Text](#)

Plant Identifier & Plant Care

- AI-backed plant identification product with disease guidance, care routines, reminders, saved plants, and follow-up assistance. Public Google Play listing: 100K+ installs.
- **Tech:** Kotlin, Jetpack Compose, Clean Architecture, MVVM, Ktor, Koin, Firebase
- **Google Play Store Link:** [Plant Identifier & Plant Care](#)

Status Downloader & Saver

- Improved an inherited media product through screen redesign, issue fixes, monetization updates, reposting, and direct-message features. Public Google Play listing: 100K+ installs.
- **Tech:** Kotlin, Android SDK, media handling, monetization integrations
- **Google Play Store Link:** [Status Downloader & Saver](#)

Voice Recorder - Voice Memos

- Recording workspace with background capture, transcription, noise reduction, editing, and video-to-audio conversion. Public Google Play listing: 50K+ installs.
- **Tech:** Kotlin, Android media APIs, background work, Firebase
- **Google Play Store Link:** [Voice Recorder - Voice Memos](#)

App Blocker: Block Apps, Sites

- Digital-wellbeing utility with app and website blocking, schedules, usage reports, strict mode, and PIN controls. Public Google Play listing: 10K+ installs.
- **Tech:** Kotlin, Android SDK, Accessibility Service, background work
- **Google Play Store Link:** [App Blocker: Block Apps, Sites](#)

Football Score - Live Scores

- Live football companion for scores, fixtures, standings, favorite teams, and time-sensitive match notifications. Public Google Play listing: 10K+ installs.
- **Tech:** Kotlin, Android SDK, REST APIs, notifications
- **Google Play Store Link:** [Football Score - Live Scores](#)

Hidden Device Detector: Finder

- Privacy utility combining network inspection, magnetometer input, infrared-assisted checks, and offline tools. Public Google Play listing: 10K+ installs.
- **Tech:** Kotlin, Android SDK, network APIs, device sensors
- **Google Play Store Link:** [Hidden Device Detector: Finder](#)

Coin Identifier: Value Scanner

- Maintained an image-based coin identification product by updating its monetization implementation. Public Google Play listing: 10K+ installs.
- **Tech:** Kotlin, Android SDK, monetization integrations
- **Google Play Store Link:** [Coin Identifier: Value Scanner](#)

Route Planner - GPS & Maps

- All-in-one travel assistant with multi-stop route planner, nearby place finder, GPS navigation, parking finder and live weather updates.
- **Tech:** Kotlin, Jetpack Compose, MVVM, Google Maps API
- **Google Play Store Link:** [Route Planner - GPS & Maps](#)

Schedule Planner & Todo App

- GPS navigation app with saved locations, search history, compass, distance calculation and Google Maps/Street View integration.
- **Tech:** Kotlin, XML, MVVM, Room, Google Maps API
- **Google Play Store Link:** [Todo List - Schedule Planner](#)

Prank Sounds App

- Prank soundboard with cloud audio, offline favorites, ringtone/alarm integration.
- **Tech:** Kotlin, XML, Firebase Storage, Room, MediaPlayer.
- **Google Play Store Link:** [Prank Sounds App](#)

Education

MS Artificial Intelligence and Autonomous Systems

National University of Sciences and Technology (NUST), Islamabad | 2026 - Present

Bachelor of Science in Computer Science

Bahauddin Zakariya University | Completed June 2025

- **CGPA:** 3.59
-

Certifications and Professional Development

M-Labs Summer Program 2024 - Mindstorm Studios

- Certificate of Participation in structured software-development, teamwork, and project training.
-

Languages

- English
 - Urdu
-

Interests

- **AI and Autonomous Systems:** Applying advanced AI concepts to practical mobile products.
- **Android Product Engineering:** Architecture, platform APIs, reliability, and user-focused delivery.
- **Mobile Growth Systems:** Ethical monetization, subscriptions, analytics, and premium experiences.
