

Muhammad Shahroze

ANDROID ENGINEER | KOTLIN | JETPACK COMPOSE

Multan, Pakistan | Relocating to Islamabad | smshahroze16602@gmail.com

<https://linkedin.com/in/muhammad-shahroze> | <https://github.com/Shahroze16602>

PROFESSIONAL SUMMARY

Android Engineer with 3+ years of experience designing, developing, releasing, and maintaining native mobile applications using Kotlin, Java, Android SDK, Jetpack Compose, XML, Clean Architecture, and MVVM. Production experience spans location and maps, productivity, audio and media, AI-assisted utilities, Firebase, REST APIs, Google Play Billing, RevenueCat, AdMob monetization, crash and ANR resolution, and Google Play delivery. Available for remote roles with US and European teams and hybrid opportunities in Islamabad.

PROFESSIONAL EXPERIENCE

Android App Developer | Top Edge Technologies (Pvt) Ltd

May 2025 - Present | Pakistan

- Engineer and maintain native Android applications using Kotlin, Jetpack Compose, Clean Architecture, MVVM, Room, Ktor, Koin, Firebase, and Google APIs.
- Deliver production features across location, productivity, media, utility, and AI-assisted product categories, from implementation through Google Play release support.
- Diagnose and resolve crashes, Application Not Responding (ANR) issues, lifecycle defects, and regressions in inherited Android codebases using Crashlytics and production evidence.
- Implement and refine AdMob plans and placements, subscriptions, one-time purchases, and premium screens to improve ad show rates, revenue delivery, and purchase conversion opportunities without exposing confidential performance data.
- Designed and built a reusable billing module supporting Google Play Billing and RevenueCat, including purchase acknowledgement, restoration, subscription-state handling, error and retry flows, analytics, and remote configuration; used across multiple company applications.

Android App Developer | Appsqueeze Technologies (Pvt) Ltd

September 2023 - April 2025 | Pakistan

- Developed native Android applications with Kotlin, Java, Android SDK, XML layouts, and Material Design components.
- Applied MVVM, Room, Retrofit, Firebase Authentication, and Firebase Realtime Database to connected, data-driven product features.
- Built responsive user interfaces, debugged production issues, and supported reliable releases across Android versions and device configurations.
- Collaborated through Git-based development workflows and maintained clear ownership of assigned application features.

EDUCATION

MS Artificial Intelligence and Autonomous Systems

National University of Sciences and Technology (NUST), Islamabad | 2026 - Present

Bachelor of Science in Computer Science

Bahauddin Zakariya University, Multan | Completed June 2025 | CGPA: 3.59

PROFESSIONAL DEVELOPMENT

M-Labs Summer Program 2024 | Mindstorm Studios | Certificate of Participation

TECHNICAL SKILLS

Languages and Android: Kotlin, Java, Android SDK, Jetpack Compose, XML layouts, Material Design, Navigation, lifecycle-aware state, background work, notifications

Architecture and data: Clean Architecture, MVVM, modular architecture, Room, SQLite, dependency injection, Koin, Hilt, Ktor, Retrofit, REST APIs

Firestore and backend: Firebase Authentication, Realtime Database, Crashlytics, Analytics, Remote Config, MongoDB, Node.js, Socket.io, JavaScript, TypeScript

Platform integrations: Google Maps API, location and navigation, Google Calendar, Google Drive, audio and media, sensors, printing

Billing and monetization: Google Play Billing, RevenueCat, subscriptions, one-time purchases, purchase acknowledgement, restoration, subscription-state handling, error and retry flows, AdMob, ad placements, premium screens

Reliability, delivery, and AI: Crash and ANR triage, production debugging, regression testing, Git, Google Play releases; Claude, Codex, ChatGPT, and Antigravity for AI-assisted engineering

SELECTED ANDROID PROJECTS

Public install bands indicate product scale on Google Play and are not presented as growth attributed solely to my work.

Plant Identifier | 100K+ installs

An AI-backed plant companion that turns a camera input into identification, disease guidance, care routines, reminders, and follow-up conversation. Technologies: Kotlin, Jetpack Compose, Clean Architecture, MVVM.

Schedule Planner | 100K+ installs

A persistent daily planning system connecting tasks, schedules, reminders, notes, and calendar context. Technologies: Kotlin, MVVM, Room, Google Calendar.

Route Planner | 100K+ installs

A multi-feature travel utility combining route planning, navigation, places, compass, weather, and parking context. Technologies: Kotlin, Jetpack Compose, MVVM, Google Maps API.

Voice Recorder | 50K+ installs

A recording workspace spanning background capture, transcription, noise reduction, editing, and video-to-audio conversion. Technologies: Kotlin, Android media APIs, Background work, Firebase.

ADDITIONAL ANDROID APPS ENGINEERED FROM SCRATCH

App Blocker | 10K+ installs - Kotlin, Android SDK, Production APIs

Football Live Scores | 10K+ installs - Kotlin, Android SDK, Production APIs

Hidden Device Detector | 10K+ installs - Kotlin, Android SDK, Production APIs

Fake GPS | 5K+ installs - Kotlin, Android SDK, Production APIs

Smart Printer | 5K+ installs - Kotlin, Android SDK, Production APIs

Antique Identifier | 1K+ installs - Kotlin, Android SDK, Production APIs

Recover Messages | 1K+ installs - Kotlin, Android SDK, Production APIs

Notification Blocker | 500+ installs - Kotlin, Android SDK, Production APIs

PRODUCTION MAINTENANCE AND PRODUCT IMPROVEMENTS

Voice Notepad - Speech to Text | 1M+ installs - Screen redesign, issue fixes, and monetization updates

Status Downloader and Saver | 100K+ installs - Screen redesign, issue fixes, monetization, reposting, and direct-message features

Coin Identifier: Value Scanner | 10K+ installs - Monetization updates

Medication Reminder and Tracker | 5K+ installs - Monetization updates

Copy Data: Phone Transfer | 1K+ installs - Monetization updates

Stone Identifier: Rock Scanner | 100+ installs - Monetization updates

EARLIER PROJECTS

AI Chatbot | Artificial intelligence - Kotlin, Firebase Authentication, REST APIs, Room; real-time chat and image generation

Cryptographic Communication | Security - Kotlin, Next.js, Node.js, Socket.io; encrypted Android and web messaging
